RESOURCE

A Catalog of Publications and Computer Programs

Communications and Computing Services
Cooperative Extension Division
Agricultural Research Division
Institute of Agriculture and Natural Resources
University of Nebraska-Lincoln

March 1994

Issued in furtherance of Cooperative Extension work, Acts of May 8 and June 30, 1914, in cooperation with the U.S. Department of Agriculture. Kenneth R. Bolen, Director of Cooperative Extension, University of Nebraska, Institute of Agriculture and Natural Resources.

It is the policy of the University of Nebraska-Lincoln Institute of Agriculture and Natural Resources not to discriminate on the basis of sex, age, handicap, race, color, religion, marital status, veteran's status, national or ethnic origin or sexual orientation.

USING THIS CATALOG

The resources in this catalog are distributed by Communications and Computing Services at the University of Nebraska-Lincoln. They are available to Nebraska residents at Nebraska Cooperative Extension offices throughout the state. Out-of-state residents should use the order forms provided at the back of this catalog.

Most of the publications are intended for the public—especially farmers, consumers and families. Many of the publications interpret results of university research in agriculture. Others offer practical tips on issues relevant to home and family, natural resources management, forestry, gardening, nutrition, soil, and water quality.

You should check with your local Extension office before ordering publications directly from Communications and Computing Services at UN-L. By doing so you will save shipping and handling charges. Nebraska Extension office addresses and phone numbers are shown on pages 4-6.

Publication Charges: Due to increasing publishing costs, as of November 1, 1991 charges for some Cooperative Extension publications were implemented. This catalog shows a price for all publications, however, Nebraska residents may obtain without charge single copies of up to ten different titles of all publications marked with this symbol ♦. For multiple copies a charge of \$.25 per copy will be assessed.

Sales Tax: Order forms found at the back of this catalog indicate Nebraska residents should pay state and local sales tax for all orders. Publications sold at local Extension offices include sales tax in their price.

Payment: Orders of \$10.00 and under and all foreign orders must be prepaid. Make checks or money orders payable to the University of Nebraska for total amount of order including sales tax and shipping. Foreign orders should be paid in U.S. funds.

Purchase Orders: Purchase orders will be accepted from other Extension services, schools, companies and public agencies. Shipping charges will be charged proportionately and billed to your Purchase Order number. Please include your sales tax exemption number.

Price and Availability: Price and availability of publications and other resources are subject to change. Be certain you have the current catalog, since out-of-date publications are removed from stock and new ones are added regularly.

If invoice quantity shipped is less than the quantity ordered that indicates the item is out of stock. No backorders will be filled. Items should be reordered at a later time.

Out-of-State Ordering: Out-of-state residents may obtain resources listed in this catalog by sending the order form and payment to:

Bulletins
P.O. Box 830918
Lincoln NE 68583-0918

FAX orders to (402)472-3093.

Shipping Costs: Please add the total of your order and include shipping charges via USPS:

<i>Amount of Order</i>	<i>Shipping Charges</i>
\$ 0.01 to \$ 1.50	\$0.55
1.51 to 4.99	\$1.00
5.00 to 20.00	\$2.50
20.01 to 50.00	\$5.00

Publications Orders with individual items listed at \$5.00 or more will be shipped via UPS.

<i>Amount of Order</i>	<i>Shipping Charges</i>
\$ 5.00 to \$10.00	\$2.75
10.01 to 20.00	\$3.75
20.01 and over	\$5.00

Large bulk orders will be billed for shipping charges via the invoice.

Quantity discounts: A discount of 10% will be made on quantities of 200 copies or more of a single item.

NON-ICCS COMPUTER PROGRAMS

The following computer programs are available only from their author. **DO NOT ORDER** them using this ICCS Catalog Order Form.

CP 7 HOGSHARE. This spreadsheet template is designed to assist farmers in the development and analysis of hog sharing arrangements. Producers enter information about equipment, machinery, facilities, feed, and the animals involved in the swine operation. HOGSHARE will estimate the "fair share" of pigs for each party involved based on their contributions to the swine enterprise. Program Requirements: Lotus 1-2-3 (Version 2.01 or greater) and MS-DOS (Version 3 or greater). HOGSHARE needs 120K of free memory space in Lotus 1-2-3 to run. *The software is available from the author at the Northeast Research and Extension Center (402-584-2261); Tim Powell, Farm Management Specialist, Box 111, Concord, NE 68728-0111.* Complete documentation is provided. Cost: \$10.00. Please indicate disk size preferred.

CP 8 WFMACH\$ —Whole Farm Machine Cost Estimator. WFMACH\$ is a Lotus 1-2-3 spreadsheet program that calculates machinery ownership, repair, and operating costs on a per operation basis. Various costs, such as interest, depreciation, repairs, labor, and fuel, can be accumulated by operation, summed per enterprise, and then totalled for a whole farm analysis. *The software is available from the authors at the Panhandle Research and Extension Center (308-632-1241); Daryl Ellis, 4502 Avenue I, Scottsbluff, NE 69361-0224.* Complete documentation is provided. Cost: \$15.00. Please indicate disk size preferred.

Ag Econ Department Report 156, March 1988-INDEX. INDEX is a Lotus 1-2-3 spreadsheet program that helps construct seasonal indexes from monthly data. Seasonal patterns are movements or fluctuations which occur within a year. INDEX has been widely used to calculate monthly seasonal price patterns and to estimate potential seasonal price movement. *INDEX is available from the authors at the Panhandle Research and Extension Center (308-632-1241); Daryl Ellis, 4502 Avenue I, Scottsbluff, NE 69361-0224.* Complete documentation is provided. Cost: \$15.00. Please indicate disk size preferred.

ICCS COMPUTER PROGRAMS

The following programs are available for IBM and IBM-compatible computers from ICCS.

CP 1 Nebraska PC-Cowcard - A Beef Cow-Calf Micro-computer Program. This program, written for the commercial cow-calf producer, stores, summarizes and analyzes large quantities of information on the cow herd including cow-calf histories and bull histories. It generates worksheets, reports and at the end of the year, automatically transfers pertinent data to the cow card and recalculates a new MPPA and averages for important traits. Requires 640K and 10 megabyte hard disk; DOS 2.1 or later, DOS 4 not recommended. (FOR SALE ONLY: \$150.00)

CP 2 Share Arrangements for Cow-calf or Cow-yearling Operation: COWSHARE A Spreadsheet Program. COWSHARE is a micro-computer Lotus 1-2-3 spreadsheet program to assist in the analysis of cow-calf or cow-yearling share arrangements. The approach used to determine "fair" share arrangements is based on the economic contributions of each party. The option of raising or purchasing replacement heifers is also provided in the analysis. DOS 2.1 or later. Available on 5 1/4" diskette only. (FOR SALE ONLY: \$15.00)

CP 3 Erosion - Universal Soil Equation: A Handbook for Nebraska Producers. This program helps landowners learn the effects of varying cropping practices, soil types and rainfall amounts on soil erosion. It includes a copy of the publication, EC 88-116: Universal Soil Equation: A Handbook for Nebraska Producers. Available on 5 1/4" diskette only. (FOR SALE ONLY: \$5.00)

CP 4 Pump Alternatives. This computerized spreadsheet was developed to calculate the operating costs for a number of possible changes in an established pumping plant. It was designed to help irrigators calculate the cost of savings of these changes. Includes a copy of the publication EC 88-729, Irrigation Pumping Plant Alternatives. DOS 2.1 or later. Available on 5 1/4" diskettes only. (FOR SALE ONLY: \$10.00)

CP 5 European Corn Borer. This program is a powerful tool to manage the European Corn Borer in Nebraska field corn. The program predicts when second generation moths will lay eggs and when fields should be scouted. Scouting information is analyzed for relevant factors in deciding if insecticide treatment would be profitable, comparing predicted economic losses and control costs for individual fields. Minimum of 256K of RAM, DOS 2.1 or later. (FOR SALE ONLY: \$65.00 plus \$4.23 sales tax and \$2.00 shipping [\$71.23] for each copy ordered). Specify diskette size. Note: This software package will be sold only to Nebraska residents.

CP 6 TERM-Term Loan Amortization and Calculation of Loan Balances. TERM is a micro-computer spreadsheet program to assist in the calculation of daily interest accrual loan amortizations, recording of payments against the loan, and determining the current balances of principal and interest. The ability to accrue interest on a daily basis, calculate equal installment or mortgage payments, record payments of irregular intervals differentiates TERM from other computer generated amortization schedules. DOS 2.1 or later. (FOR SALE ONLY: \$15.00)

CP 9 SOILTEST. This software will provide the user with soil fertilizer recommendations using information from a soil analysis. Soil analysis data can be imported into the program via a disk file, or through the keyboard. Output can be printed, or exported to a disk file for use with word processing software to facilitate printing on forms. DOS 2.1 or later. (FOR SALE ONLY: \$35.00)

CP 10 PC-IRRIGATE. PC-Irrigate is irrigation scheduling software designed for use in Nebraska. This software will maintain a list of fields and crop water use data and projections for each field. Required daily weather data entries are, maximum temperature, minimum temperature and potential evapotranspiration (Potential ET). PC-Irrigate calculates crop coefficients for corn, soybeans or alfalfa. Historical, regional weather data is used to project future crop water use and determine irrigation needs for Nebraska crop growing regions only. IBM compatible computer with an 80286 or larger processor; 5 1/4" high-density 1.2M floppy disk drive OR one 3 1/2" high-density 1.44M floppy disk drive; hard disk drive; DOS 2.0 or later; 640K RAM (2MB recommended); (optional) graphics monitor to display graphics. (FOR SALE ONLY: \$95.00)

CP 11 Nebraska HERB. The purpose of Nebraska HERB is to make postemergence weed control decisions easier. The software helps determine the expected dollar value loss of a particular weed infestation. Nebraska HERB helps users assess the cost effectiveness of weed control and identifies the herbicide, if any, which will provide the most effective and economical control. Nebraska HERB is now being offered for postemergence weed control in soybeans. Similar programs will soon be available for corn producers and soil applied herbicides. DOS 2.1 or later, 512K or RAM required. (FOR SALE ONLY \$135 plus \$10 shipping and handling.)

NebGuides by Mail

Enjoy the convenience of having your NebGuides delivered by mail each month by subscribing to our NebGuide mailing service.

As a subscriber, you'll receive all new and revised NebGuides each month as they are published, and timely special mailings as necessary in addition to the regular monthly mailings—at no extra cost! You can also use this form to start a subscription for another party as a gift.

The annual subscription fee is \$18.00 for Nebraskans and \$24.00 for out-of-state subscribers. This fee is pro-rated, however, so you pay *only* for the months you receive the mailings. For example, if you subscribe in June, you pay only \$10.50 (\$14.00 for out-of-state) for the mailings made from June through December.

To start your subscription, fill out the form below and return it with your remittance to:
